

*ABSTRACT AMENDMENTS*

Replace the Abstract with:

~~There is disclosed a~~ A spiral inductor in which ~~in the portion~~, where a spiral interconnect and an underpass interconnect intersect with each other, at least one layer of ~~electroconductive~~ an electrically conductive film ~~layer~~ that ~~form~~ forms the spiral interconnect is ~~used to form~~ the underpass interconnect. The spiral interconnect ~~formed with~~ has a smaller number of ~~electroconductive film~~ electrically conductive layers in the intersecting portion and has a wider interconnect width than the spiral interconnect ~~formed with~~ with a larger number of electroconductive films in the a non-intersecting portion.
